Discourages pests and soothes irritated skin!
Discourages bugs from reproducing in the manure!
Natural ingredients to help you horse deter biting insects!
Supports healthy skin and normal inflammatory response!

** - These products use Dried Distiller's Grains (DDGS) as a base ingredient, which is a corn by-product of the ethanol industry. While this corn product has been stripped of many beneficial nutrients, the most troublesome issue is that DDGS has a very high Omega 6 content, which has been suggested to enhance the inflammatory response of irritated skin. DDGS should be the LAST ingredient you would consider in a product designed to help promote healthy skin and to minimize discomfort.
