

**How use SU-PER Neatsfoot Oil:** Be sure to test on a small, hidden area to determine if you are happy with the slight darkening often brought about by the use of Neatsfoot Oil.

Do not apply in heavy or thick layers. Put a small amount of Neatsfoot Oil onto a very soft cloth. Quickly rub it into the leather, cover as much area as you can. Keep adding more Neatsfoot Oil in small amounts until you have covered the entire surface of your item. Once it has been applied, use another clean, soft cloth and rub briskly to remove excessive oil. This will bring out a shine, and your item will dry quickly, will look great, and will have a perfect, water-resistant finish!

*Often used on wood also, look it up!*
