SU-PER[®] C

Helps Support the Immune System!

Vitamin C provides anti-oxidant support to horses, and may help support respiratory health, cardiovascular function, and the immune system.

SU-PER[®] C is a supplement for your horse in times when additional Vitamin C is required.

Vitamin C is a powerful anti-oxidant which helps to eliminate free radicals in the body. As a water-soluble vitamin, it can work both inside and outside the cells to combat free radical damage.

Vitamin C also plays many roles in the body, including collagen synthesis, antihistamine control, bone calcification, immune support, and wound healing.

Supplementation of Vitamin C in horses is an ongoing area of debate. Humans can become severely deficient in Vitamin C because they lack the enzyme necessary to turn glucose into Vitamin C. Horses do not have this same issue though, and are able to produce their own Vitamin C. Horses that are at rest and in generally good health do not need Vitamin C supplementation.

However, there are many instances where normal Vitamin C production is not sufficient. In times of stress, high activity levels, or times of compromised immune health, the horse cannot produce enough Vitamin C to address the needs of the body.

Horses involved in competition, training, regular transport, or those recovering from illness or injury are likely to benefit most from Vitamin C supplementation. It was also found that horses that are exposed to stress regularly can have depleted Vitamin C levels.

While boosting the immune system and fighting free radicals are extremely important, perhaps the most critical role of Vitamin C is in production of Collagen, which is necessary for the formulation of joint cartilage, ligaments, tendons, bones and muscle. Anytime the body is in need of repair or maintenance of these various connective tissues, Vitamin C is required to do the job right. This adds to the importance of Vitamin C in performance horses that are putting wear and tear on their connective tissues regularly. Most performance horses may benefit from having extra Vitamin C available when it is needed.
