

SU-PER[®] Cold Gel

Freeze & Tightener!

Use when a cooling, tightening effect is desired as an aid in the temporary relief of minor soreness and stiffness due to overexertion.

SU-PER[®] Cold Gel is a tightener and leg freeze, and should be used when a cooling, tightening effect is desired. It is a soothing aid in the temporary relief of minor soreness and stiffness due to overexertion.

SU-PER[®] Cold Gel may also be used as a pre-race freeze.

SU-PER[®] Cold Gel is good for addressing ligament and tendon issues as well, such as bowed tendons, wind puffs, or suspensory issues.

Leg tighteners have been used for generations to relieve minor swelling and heat in the legs without creating significant counter-irritation. Unlike paints or blisters, tighteners like *SU-PER[®] Cold Gel* will not scurf or blister, and can be very effective in drawing out swelling in a matter of hours. It effectively works to open blood vessels to allow for better circulation throughout the legs and help provide more oxygen and nutrients to muscles and connective tissues in the applied area.

SU-PER[®] Cold Gel is a great option when ice treatment is not available, or during transport. It's also easier to work with and less messy than your typical poultice.

For horses with a history of ligament and tendon issues, *SU-PER[®] Cold Gel* is a valuable pre-event treatment to help keep problem areas tight.

GEL
Pint
Gallon

DIRECTIONS FOR USE:

Apply a liberal amount to the leg (approximately 1/4" thick) rubbing well into the hair. Bandage and leave on leg for 12 to 24 hours. Repeat as necessary. Removes easily with warm water.

DIRECTIONS FOR PRE-EVENT USE:

12 to 24 hours prior to event:

Use as instructed above.

Then 2 hours before event: Re-apply and wrap with wet, cold water bandage. Apply ice water to bandage periodically.

For Equine Use Only.
