SU-PER[®] Curazone

A Natural, Safer Alternative to Nitrofurazone!

**For application as a topical sweating agent,
and for the prevention or treatment of surface bacterial
infections of wounds, burns, and cutaneous ulcers.**

Nitrofurazone is a popular product, and can be found in nearly every barn, but **IT IS A CARCINOGEN!** It has been a well known and popular choice of horsemen for decades.

We decided that having a carcinogen in the barn for regular use is a bad idea, so we made a natural, safer alternative to nitrofurazone!

We offer a **more economical and safer alternative:** *SU-PER[®] Curazone*.

SU-PER[®] Curazone is our own, carcinogen-free version of nitrofurazone, utilizing Calachtin - our exclusive proprietary blend of natural oil extracts to help provide the ***SAME BENEFITS*** as nitrofurazone.

It works just as well as nitrofurazone,
washes off easily, and does not stain!

And best of all, it is **far more economical** than nitrofurazone.

Long-term use of nitrofurazone is not recommended, especially with open wounds, but *SU-PER[®] Curazone* can be used as often as needed, and for horses in need of long-term, consistent sweating and treatment.
