SU-PER[®] E Natural

Anti-Oxidant Support for Body Cells and Tissues!

Vitamin E is a powerful anti-oxidant that supports a healthy immune system, supports normal body functions, and helps neutralize free radicals.

If you are looking for a natural source vitamin E, we offer *SU-PER[®] E Natural*, providing 2,000 IU of natural Vitamin E per serving. By "Natural Vitamin E", we mean Vitamin E (D-Alpha Tocopherol).

Natural Vitamin E is more effective than synthetic or mixed Vitamin E sources, providing more powerful, longer lasting anti-oxidant activity. While natural Vitamin E is far more effective, it is unfortunately also more expensive. If price is not a concern, we recommend *SU-PER[®] E Natural* if you are looking for the most effective Vitamin E supplement.

Vitamin E is an effective and efficient anti-oxidant nutrient. But what exactly are antioxidants?

The body is constantly creating energy through the use of nutrients and oxygen. This process of breaking down nutrients and converting them to energy is known as oxidation. While oxidation is a critical process the body must perform to provide energy, this process also produces byproducts called free radicals. These are highly unstable, and in an attempt to stabilize themselves, they steal from healthy cells. Free radicals can quickly damage healthy cells in the body and begin a chain reaction where more and more damage occurs in a cascading effect.

While normal body functions create free radicals, there are other factors that can greatly increase free radical production. For horses, these main areas of concern are exercise, competition, pregnancy, stress, illness, inflammation and aging. Natural Vitamin E can be of benefit to horses in any of these categories and can help promote general health in any situation.

Proper supplementation of anti-oxidants can help eliminate free radicals and limit the damage they can cause. For anyone looking to maintain the health of their horse and prolong their active years, anti-oxidants are a very good investment.

If you are interested in feeding a Vitamin E supplement, but find the natural E to be too expensive, we recommend our *SU-PER[®] E-8000*. It contains synthetic Vitamin E, which is more economical, yet still works very well if fed consistently.
