SU-PER[®] Energize

To Be Used The Day of an Event!

Supports normal physical and mental performance.

Energy equals performance! Without adequate energy, your horse will simply not be able to perform at it's best. Not having energy available during competition leads quickly to fatigue and lack of stamina.

Even with all of the work done to prepare your horse for competition, the event and activity leading up to it is often stressful for your horse. Prolonged stress can deplete energy stores, leading to low energy levels when your horse needs it most.

SU-PER[®] Energize Paste is a quick, reliable, and sustainable energy source. Given 1 to 2 hours prior to competition, it works to not only provide energy, but delay fatigue, help increase oxygen stores in the bloodstream, and assist with maintaining normal behavior in stressful situations.

SU-PER[®] Energize Paste contains:

Tyrosine: This amino acid promotes alertness, attention and focus, which lend to better overall performance. In addition, Tyrosine can help regulate mood, and lessen the impact of stressful situations, thereby helping maintain higher energy levels leading up to the event. Tyrosine is a great nutrient for ensuring the best possible performance under stress.

DMG: Helps to increase oxygen uptake in the bloodstream, as well as allow more efficient use of oxygen during energy production. This is important for energy production and stamina during competition, and may delay fatigue.

Histidine and Arginine: These two amino acids work together to increase nitric oxide production, and protect it from oxidation. Nitric oxide enhances the delivery of oxygen and nutrients to working muscles, providing an energy boost on demand. When combined with DMG, these nutrients are even more effective.

Gotu Kola: This herb directly counters anxiety, and like Tyrosine, helps with focus and energy conservation.

SU-PER[®] Energize Paste is a great choice for an easy, economical, and effective boost of energy.
