SU-PER[®] Equi-Tinic

Provides Essential Minerals and Nutrients!

Provides the building blocks necessary for healthy red blood cell production, and helps combat a lack of energy and poor stamina.

Compares favorably to Lixotinic[®], but at a much better price!

Horses experience stress quite regularly, due to their natural stress response to anything out of the ordinary. Even horses that have competed hundreds of times will still experience stress in situations that would seem to be common and unthreatening.

While stress can often cause behavioral issues and inconsistent energy, one lesser known side effect of stress is vitamin and mineral deficiencies.

Stress response can cause the body to prematurely use up certain nutrients as it re-routes them to organs and muscles as a survival mechanism. B Vitamins are the most commonly used up during these stressful situations, and this effects the body's ability to create and maintain the red blood cells which rely on these nutrients. Also directly impacted is the horse's ability to produce energy, which may lead to poor performance.

SU-PER[®] Equi-Tinic is a honey and apple-flavored liquid vitamin/mineral supplement, for use in horses of any age or discipline. It helps to correct stress-induced deficiencies, and is recommended for horses involved in training, competition, or travel. It provides the nutrients necessary to support healthy red blood cells, as well as normal energy production and stamina.

This supplement is especially beneficial to the performance horse, but is also safe for yearlings or older, less active horses.
