SU-PER[®] Gain Weight

Helps Horses Reach Their Ideal Weight Safely!

Supports normal body weight and composition. Rather than simply focusing on fat for weight gain, this product promotes lean muscle mass, efficient digestion, and improved appetite.

SU-PER[®] Gain Weight is a supplement for hard keepers, and horses in need of increased body weight. This unique formula contains microencapsulated coconut oil to provide fat from a non-animal source.

However, it does not rely solely on high fat content for weight gain. This unique formula addresses the issue on several fronts. *SU-PER[®] Gain Weight* contains Branched Chain Amino Acids (BCAA's), Methionine, Lysine, and Glutamine to promote lean muscle mass and protect against muscle loss. It also contains probiotics for effective digestion and nutrient utilization, and Vitamin B-1 to help support a healthy appetite.

Some weight gain products will use vegetable oils, corn oil, or soybean oil for fat content, which we do not recommend. These oils may provide high levels of fat, but also contain extremely high levels of Omega 6 fatty acids, which can contribute to inflammatory responses, as well as other potential long-term health concerns. *SU-PER[®] Gain Weight* provides a high fat supplement without overloading your horse on Omega 6's.

A balanced approach to weight gain is very important. Horses are not designed to take in high amounts of fat, and it can cause gastric problems, especially in hard keepers. By giving a balanced supplement, weight gain can be achieved in a healthy, more effective way with no negative digestive consequences.
