SU-PER[®] Hoof Dressing

*Helps Maintain Healthy Hoof Structure,
Pliability, and Strength!*

Formulated with pine tar and other natural, deep-penetrating oils and vitamins for use on hard, dry, brittle hooves.

Keeping hooves healthy is an ongoing process. While you can always provide the right nutrients for proper hoof growth, the growth itself is very slow. Therefore, it is often necessary to provide topical support as well when the hoof is damaged, or when the hoof is at risk from environmental conditions.

Hoof dressings are a great way to maintain the hoof in adverse conditions, as well as keep the hoof wall moisturized and pliable, to reduce the risk of hoof damage.

SU-PER[®] Hoof Dressing is a traditional, all-natural dressing made with Fish Oil, Pine Tar, and essential oils. The Pine Tar works to create a protective barrier for the hoof wall, while the oils penetrate the wall to help restore moisture and create a pliable surface which resists cracking and drying.

In wet conditions, *SU-PER[®] Hoof Dressing* works to seal in the natural oils which can be stripped away by excessive moisture. It also keeps the hoof wall from becoming soft with extended periods of moist conditions which may lead to hoof damage, and also may lead to shoes and nails coming loose unexpectedly.

In hot and dry conditions, *SU-PER[®] Hoof Dressing* keeps hooves resilient and pliable, lessening the occurrence of chips and cracks. The hoof naturally expands and contracts as it comes in contact with the ground, so keeping the hoof wall moisturized is extremely important in preventing impact-related damage.

SU-PER[®] Hoof Dressing can also be used before trimming to soften the area, or to provide a nice dark, shiny hoof for show or sale.
