SU-PER® LaminAid

Supports Normal Circulation!

Recommended to support normal cardiovascular function.

SU-PER® LaminAid is a highly concentrated supplement specifically formulated to provide nutritional support for horses suffering from laminitis and/or founder, or are at risk of this type of condition. *SU-PER® LaminAid* contains high levels of Magnesium and Probiotics, as well as Chromium, Bioflavonoids, MSM and Devil's Claw, as well as dozens of support nutrients such as Grape Seed Extract, Ginseng, isolated Amino Acids, and Anti-oxidants to provide the full spectrum of nutritional support.

SU-PER® LaminAid works in several ways to help the laminitic horse. It helps to increase circulation and blood flow to the hoof area, support normal inflammatory responses, and manage discomfort. It also provides support for damaged tissues as well as nutrients which help the body deal with insulin resistance and glucose imbalances which is common for most laminitic horses.

Magnesium has been shown in numerous studies to be extremely beneficial in treating laminitis. Most laminitis supplements contain Magnesium in the form of Magnesium Oxide, but *SU-PER® LaminAid* contains Magnesium Proteinate - a chelated form of Magnesium recognized for its superior absorption rate.

There have also been many studies suggesting that Nitric Oxide production in the body can significantly increase circulation to the hoof area. *SU-PER® LaminAid* contains nutrients which effectively promote natural Nitric Oxide production.

SU-PER® LaminAid includes nutrients for hoof growth and repair as well, and is adequate for most common cases. However, if problems with hoof integrity and strength are severe, we recommend adding a separate hoof supplement, such as *SU-PER® Farrier's Supplement* to boost hoof repair.

For optimum results, we also recommend that horses suffering from Laminitis or founder receive additional amounts of Essential Fatty Acids (EFA's), such as those found in *SU-PER® OmegaFLAX* or *SU-PER® OmegaBOOST*.

Horses suffering from laminitis require a very strict diet in most cases.
Please consult your vet or nutritionist for guidelines and recommendations.
